Instructions for Use
Personal Prophylactic Hygiene Care
Male Liquid Rectal Suppositories
SCHALI® Care-MR
Reproductive System Disorders

SCHALI® Care-MR Liquid Rectal Suppositories are a highly-effective photoactive product intended for general strengthening, toning and stimulating effects, better sexual function in scope of complex treatment and prevention of reproductive system disorders and erectile dysfunction.

PRODUCT FORM:

Prophylactic hydrogel in 3 ml disposable single-dose container.

INGREDIENTS:

Aqua, Hydroxypropyl Cyclodextrin, Glycerin, Propylene Glycol, Glycereth-18 Ethylhexanoate, Glycereth-18, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Titanium Dioxide, Triethanolamine, Diazolidinyl Urea, Methylparaben, Propylparaben, Phosphoric Acid.

MECHANISM OF ACTION:

Soft hydrogel formulation of the suppositories dissolves slowly in the rectum, where it is absorbed by rectal mucosa. The product acts locally by inducing regeneration, strengthening vascular walls and improving microcirculation in capillaries. Mechanism of action is directed to improve cellular metabolism and to enhance blood supply to pelvic organs by inducing delivery of necessary nutrients and oxygen to cells.

Mineral bio-constituent of the hydrogel formulation includes fragments of a certain class of metalloid semiconductors with unsaturated bonds - titanium dioxide crystalline lattice - known for its high catalytic activity. Photoactive particles of QD SCHALI® titanium dioxide trigger generation of active oxygen forms (singlet oxygen). Mechanism of action is based on the principle of energetic neutralization of free chemical bonds on the surface of toxic compounds by saturating them with complementary oxygen atoms, generated in the result of the catalytic reaction.

Besides, active oxygen forms (singlet oxygen) trigger mechanism of activation in serotonin receptors, leading to better regulation of serotonin reuptake inhibition by selectively blocking serotonin absorption in presynaptic membrane. Re-balanced serotonin level helps in restoring homeostasis and ceasing thanatogenesis, promotes male health and central nervous system function, and improves both cellular metabolism and immune response.

Regular use of the products boosts cellular exergy exchange in muscles, tissues, free cells (lymphocytes, macrophages, spermatozoids etc.) and brain neurons, giving rise to a strong psychostimulatory effect by improving mental and physical activity, vital power and vigour. The product promotes vegetative and endocrinal regulation, resulting in better vascular tone in urogenital organs, wider peripheral blood vessels, and more blood supply to genitals. This induces central mechanism of erectile regulation and increases libido.

The product is intended for personal care purposes, has preventive action and may be used as complex therapy and photodynamic therapy agents in treatment of male reproductive system disorders for better male health, higher immunity defence (induced specific and non-specific factors) and better immune response.

Hypoallergenic product.

INDICATIONS:

Sexual Dysfunction:

- Libido disturbance (low libido, loss of sexual desire, lack of sexual pleasure)
- Sexual arousal disturbance (low erection, no erection)
- Orgasm disturbance (premature ejaculation, bradyorgasmia, hypoorgasmia, anorgasmia)

Fears, "syndrome of anxious expectation during sex".

METHOD OF USE:

For rectal use only.

Take one single-dose container out of the package with clean hands, insert into the rectum and press out its content, while lying on your side. Apply one suppository 2 times a day for one month. Extend your course of treatment up to 90 days, if necessary.

SIDE EFFECTS:

No side effects found.

No product dependence and no rebound syndrome.

CONTRAINDICATIONS:

No contraindications detected.

STORAGE CONDITIONS:

Keep the product in a dark cool place at the temperature below 25°C.

SHELF LIFE:

Shelf life is 3 years from the date of production.

Do not use the product after expiration of the date of production, specified on the package.
