

Instructions for Use
Personal Prophylactic Hygiene Care
Male Rectal Suppositories
SCHALI® Care–ME
Endocrine Disorders

SCHALI® Care–ME Rectal Suppositories are a male personal care hygiene product intended to relieve arrhythmia conditions, high arterial tension, tremor, headache, and improve cerebral blood supply in scope of complex treatment and prevention of endocrine and lymphatic system disorders.

PRODUCT FORM:

Lubricating prophylactic suppositories, 2 g.

INGREDIENTS:

The product contains environmental friendly biocompatible ingredients of plant and mineral origin.

Cocoa butter, Pumpkin seed oil, Bee glue, Camelliae Sinensis non fermentata folia extract, Ginseng Radix extract, Liquiritiae radix extract, Griffonia simplicifolia seed extract, Vitamin E, Titanium dioxide.

MECHANISM OF ACTION:

Based on natural plant oils and butters, minerals and phytoextracts, the product dissolves slowly in the rectum, where it is absorbed by rectal mucosa and exerts anti-inflammatory and regenerating effects. The product acts locally by strengthening vascular walls and improving microcirculation in capillaries. Plant and mineral ingredients and their constituents are capable of lowering fat absorption in the intestine by suppressing pancreatic ferment – lipase, affecting fat splitting, giving rise to removal of intact dietary fats and in this way supporting liver function.

Active ingredients of the product may relieve inflammation, pain, intoxication, inhibit generation of antibodies to thyroid body and promote all types of metabolism.

Griffonia simplicifolia induces male endocrine system, affects non-specific reactivity, and regulates metabolism.

Vitamin E is involved in metabolism of proteins that bind thyroid hormones, promotes endocrine system function and prevents oxidation of hormones produced by endocrine glands.

Zinc and magnesium that are constituents of the pumpkin seed oil, are involved in both insulin production and regulation of nervous and cardiovascular systems function (they contribute to alleviation of tachycardia conditions, hyperhidrosis, tremor, anxiety etc.).

The product is intended for personal care purposes, has preventive action and may be used as a complex therapy agent in treatment of a wide range of endocrine and lymphatic system disorders for lower vascular penetrability, less oedema and inflammation in the thyroid gland.

Hypoallergenic product.

INDICATIONS:

- Obesity
- Diabetes conditions
- Thyroiditis
- Thyrotoxicosis

- Ankylosing spondylitis
- Bone injury
- Mixed connective tissue disease
- Post-traumatic and post-surgical pain syndrome

METHOD OF USE:

For rectal use only.

Take the product out of the package with clean hands and insert, pointed end first, into the rectum, while lying on your side. Apply one suppository 2 times a day for one month. Extend your course of treatment up to 90 days, if necessary.

SIDE EFFECTS:

No side effects found.

No product dependence and no rebound syndrome.

CONTRAINDICATIONS:

No contraindications detected.

STORAGE CONDITIONS:

Keep the product in a dark cool place at the temperature between +4°C and 15°C.

SHELF LIFE:

Shelf life is 2 years from the date of production.

Do not use the product after expiration of the date of production, specified on the package.
