Instructions for Use
Personal Prophylactic Hygiene Care
Male Rectal Suppositories
SCHALI® Care–MU
Adjuvant Urology

SCHALI® Care–MU Rectal Suppositories are a male personal care hygiene product intended for general strengthening, stimulating and anti-inflammatory effects in scope of complex treatment and prevention of urological disorders and benign growths in urogenital organs.

PRODUCT FORM:

Lubricating prophylactic suppositories, 2 g.

INGREDIENTS:

The product contains environmental friendly biocompatible ingredients of plant and mineral origin.

Cocoa butter, Pumpkin seed oil, Bee glue, Camelliae Sinensis non fermentata folia extract, Ginseng Radix extract, Liquiritiae radix extract, Griffonia simplicifolia seed extract, Vitamin E, Titanium dioxide.

MECHANISM OF ACTION:

Based on natural plant oils and butters, minerals and phytoextracts, the product dissolves slowly in the rectum, where it is absorbed by rectal mucosa and exerts anti-inflammatory and regenerating effects. The product acts locally by strengthening vascular walls and improving microcirculation in capillaries. Plant and mineral ingredients and their constituents act as free radicals scavengers, inhibit oxidative stress, prevent cellular accumulation of lipid peroxidation products, enhancing in this way mechanisms of cellular antioxidant defence, toxin removal, regeneration and resistance to infection and other harmful external factors.

Titanium dioxide is widely known for its bactericidal effect and is capable to remove harmful exogenous and endogenous toxins. Titanium dioxide also triggers generation of active oxygen forms, resulting in a strong antibacterial action in cells.

The product shows no immunotoxic action and causes no immune hyporeactivity: alpha- and gamma-interferon synthesis is not affected even after a long-term use of the product.

Regular use of the product induces factors of both specific and non-specific defence system against foreign agents, i.e. antigens. Besides, the product triggers both spontaneous and induced synthesis of cytokines mostly produced in the mononuclear phagocyte system and neutrophils.

The product is intended for personal care purposes, has preventive action and may be used as a complex therapy agent in treatment of a wide range of urological conditions for lower tone in smooth cells of bladder neck, prostate, male urethra etc. and for better detrusor muscle function.

Hypoallergenic product.

INDICATIONS:

- Genital Benign Neoplasms: Penis benign tumors: Leucoplakia, Serous obliterans balanitis, Genital warts
- Scrotum benign tumors: Epidermal cysts (sebaceous cysts), Papilloma
- Benign prostate tumors: Adenoma

METHOD OF USE:

For rectal use only.

Take the product out of the package with clean hands and insert, pointed end first, into the rectum, while lying on your side. Apply one suppository 2 times a day for one month. Extend your course of treatment up to 90 days, if necessary.

SIDE EFFECTS:

No side effects found.

No product dependence and no rebound syndrome.

CONTRAINDICATIONS:

No contraindications detected.

STORAGE CONDITIONS:

Keep the product in a dark cool place at the temperature between +4°C and 15°C.

SHELF LIFE:

Shelf life is 2 years from the date of production.

Do not use the product after expiration of the date of production, specified on the package.
